Invest in the
IDFC Capital Protection Oriented Fund - Series I
A three year close ended scheme

KEY INFORMATION MEMORANDUM (KIM)

New Fund Offer Opens: February 24, 2010, New Fund Offer Closes: March 24, 2010

Offer of Units of at Rs. 10 per unit during the New Fund Offer Period

Rated AAA (so) by CRISIL

"AAA (so)" Rating is being assigned by CRISIL and is only valid for IDFC Capital Protection Oriented Fund Series I. The rating only indicates highest degree of certainty regarding payment of face value of investment (excluding entry load charged, if any) to the unit holders on maturity and is not an opinion on the stability of the scheme's NAV before its maturity dates. The rating will be reviewed on a quarterly basis.

Name of Mutual Fund	: IDFC Mutual Fund
Name of Asset Management Company	: IDFC Asset Management Company Limited
Name of Trustee Company	: IDFC AMC Trustee Company Limited
Addresses of the entities	: One India Bulls Centre, 841, Jupiter Mills Compound, Senapati Bapat Marg, Elphinstone Road (West), Mumbai - 400 013.

KEY INFORMATION MEMORANDUM

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.idfcmf.com.**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

Investment Objective	The scheme endeavours to protect the capital by investing in high quality fixed income securities as the primary objective and generate capital appreciation by investing in equity and equity related instruments as a secondary objective. However, there can be no assurance that the investment objective of the scheme will be realized.
-----------------------------	---

Asset Allocation Pattern of the scheme	Types of Instruments	Normal Allocation (% of Net Assets)
	Equities & Equity Related securities*	0 – 16
	Debt securities & Money Market instruments [#]	84 – 100 (0 – 30 % in securitized instruments)

*Equity Derivatives (futures and options) may be used in place of cash equities with the condition that the total notional exposure together with the investments in equities will not exceed the allocation of the corpus towards equity investments at any point of time.

Investments in derivatives shall be in accordance with SEBI Circulars dated January 20, 2006 and September 20, 2006.

The use of derivative shall only be for hedging and portfolio rebalancing. Also such use shall be for the purpose of static hedge strategy only. Further the use of derivatives and not options only shall be restricted to avoid any downside risk to the investor.

The total exposure to equity, debt and derivative positions on a gross basis will not exceed 100% of the net assets of the scheme.

[#]The scheme shall not invest in securitized instruments, other than single loan sell downs. At any point of time such investment shall not exceed 30 % of the scheme corpus. Exposure to securitized debt shall be within the overall exposure to debt securities and money market instruments.

The scheme will initially deploy atleast 84% of the funds collected during the new fund offer in debt securities/money market instruments with an intention to protect the principal at the time of maturity of respective plans

The scheme will invest in a portfolio predominantly of fixed income securities that matures on or before the date of the maturity of the scheme. (3 years)

Fund Manager may alter allocation during subsequent deployment of funds provided such deployment is generated out of appreciation in value of (existing) investments.

Fund manager shall endeavor that capital remains protected on maturity and ensure rating of the scheme is not adversely affected.

Investment strategy of the scheme

The scheme will endeavor to achieve stability of capital (with an intent to protect capital) and generate reasonable return by building a portfolio that is a judicious mix of safe debt and money market instruments and good quality equity instruments. The debt and money market instruments would bring about the safety element in the scheme and the well researched good quality equity instruments would enable the scheme to provide reasonable returns. Such asset allocation would inter-alia depend on various parameters like the level of interest rates in the economy, underlying economic growth rates, inflation, conditions of the equity markets, profitability of the corporate sector etc. The scheme will try and shift allocations from equity to debt and vice-versa on a regular basis so as to achieve the stated objective of the scheme.

The Scheme will initially deploy at least 84% of the funds collected during the New Fund Offer in debt securities/money market instruments with an intention to protect the principal at the time of maturity of the scheme.

The Fund Manager(s), may alter the asset allocation pattern mentioned above at the time of any subsequent deployment of funds generated out of the appreciation in the value of the investments to the extent deemed appropriate in the best interest of the investors, while endeavouring that the capital will remain protected on maturity and ensuring that the rating of the Scheme is not adversely affected. Hence, the asset allocation pattern mentioned above is not a steady state pattern; it is the allocation pattern for the initial deployment of funds collected during the New Fund Offer.

The asset allocation pattern described above would alter from time to time on keeping in view market conditions, market opportunities, applicable regulations and political, economic factors and review by rating agency.

The scheme will invest in a portfolio predominantly of fixed income securities that are generally maturing in line with the duration of the scheme (3 years).

The scheme shall follow a passive investment strategy for the fixed income component of the Scheme.

The scheme shall mature on March 31, 2013. If the maturity date falls on a holiday, the maturity date would be the following business day.

Investment approach for equity allocations:

The scheme will invest in well-managed growth companies that are available at reasonable value. Companies would be identified through a systematic process of reviewing the company's financial performance and valuations.

The guiding principles while managing the equity portfolio are summarized below:

1) Sustainable company profits drives long term share value

Fund management would focus primarily on business fundamentals of the underlying company. The Equity Research process will endeavor to acquire a robust understanding of the dynamics of the underlying business. This would form the basis for forecasts on future profitability and sustainability of cash profit growth. Stock prices of companies that can sustain periods of high cash profit growth, generally outperform the markets over the long term. Investors entering this scheme are therefore expected to have at least a one year time horizon.

2) Acquire stocks at reasonable value

Once good businesses are identified, stocks would be endeavored to be acquired when they are available at a reasonable value. Overall market corrections and stock price falls due to temporary factors that don't affect long-term profitability are an excellent opportunity to buy stocks cheap.

3) Monitor market interest to ensure consistent performance

Systematically tracking over stock ownership and over researched sectors would help to reduce the risk of a sudden sell off. Stock prices react to event triggers that are constantly monitored to ensure that portfolio performance is relatively more consistent.

Risk Profile of the Scheme

- The scheme is “oriented towards protection of capital” and “not with guaranteed returns”. The scheme does not guarantee any returns. The orientation towards protection of capital originates from the structure of the Portfolio of the Scheme and not from any Bank guarantee, Insurance Cover etc. There is no assurance that the structure would provide the necessary protection of capital.
- Factors such as interest rate movements, reinvestment risk, credit defaults etc. can impact the ability of the portfolio to meet capital protection on maturity.
- All CRISIL ratings are under surveillance. CRISIL reserves the right to suspend, withdraw or revise the above ratings at any time on the basis of any new information or unavailability of information or any other circumstances which CRISIL believes may have an impact on the rating.
- The initial investment mix of the scheme is based upon assumptions on collections, pre-determined initial and running expenses and yield on the securities in the fixed income portfolio.
- The scheme could face reinvestment risks on interim interest cash flows, if the yield on such reinvestments is lower than the yield on the initial investments.

The Scheme also proposes to invest in equity and equity related instruments. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities' purchases due to settlement problems could cause the Scheme to miss certain investment opportunities.

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme would invest as given in the scheme information document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Repurchase Risk: The Scheme is a close ended income Scheme. No redemption/repurchase of units shall be allowed prior to the maturity of the scheme. Investors wishing to exit may do so through stock exchange mode. Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

Risk Factors for derivatives

1. Credit Risk: The credit risk is the risk that the counter party will default obligations and is generally negligible, as there is no exchange of principal amounts in a derivative transaction. (especially in case of debt derivatives).
2. Market risk: Derivatives carry the risk of adverse changes in the market price.
3. Illiquidity risk: The risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.
4. The risk is to the extent that returns are limited for the investors in case of extreme movement in call rates. (applicable to debt derivatives)
5. The fund pays the daily compounded rate. In practice however there can be a difference in the actual rate at which money is lent in the call market and the benchmark, which appears and is used. (applicable to debt derivatives)

Dematerialization

The Unit holders are given an Option to hold the units by way of an Account Statement or in Dematerialized ('Demat') form. Unit holders opting to hold the units in demat form must provide their Demat Account details in the specified section of the application form. The Unit holder intending to hold the units in Demat form are required to have a beneficiary account with a Depository Participant (DP) (registered with NSDL / CDSL as may be indicated by the Fund at the time of launch of the scheme) and will be required to indicate in the application the DP's name, DP ID Number and the beneficiary account number of the applicant held with the DP.

In case the unit holders do not provide their Demat Account details, an Account Statement shall be sent to them. Such investors will not be able to trade in the stock exchange till their holdings are converted into demat form.

No redemption/repurchase of units shall be allowed prior to the maturity of the scheme. Unit holders wishing to exit may do so through the Stock Exchange mode.

Risk management strategies

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity and debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in equities and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk & Description specific to Equities and Debt	Risk mitigants / management strategy
Quality risk	
Risk of investing in unsustainable/weak companies	Investment universe carefully selected to only include high quality businesses. Stringent credit evaluation process for debt securities.
Concentration risk	
	The fund manager will create a well diversified portfolio of high quality names.
Liquidity risk	
High impact costs	Fixed income portfolio will have a duration that matches the duration of the scheme.
Volatility	
Price volatility due to company or portfolio specific factors	Asset allocation between debt and equity will mitigate the volatility effect of equities.

Sub Plans and Options	Sub Plans: Nil	Option: Dividend & Growth															
Applicable NAV for repurchase	This is a close ended scheme. Units shall be on offer for subscription only during the New Fund Offer period.																
Minimum Application Amount / Number of Units	Purchase Rs. 5,000/- per application and in multiples of Rs. 10/- thereafter.	Repurchase No redemption/repurchase of units shall be allowed prior to the maturity of the scheme. Investors wishing to exit may do so through stock exchange mode.															
Despatch of Repurchase (Redemption) Request	Within 10 working days of the receipt of the redemption request at the authorised centre of IDFC Mutual Fund.																
Benchmark Index	CRISIL MIP Blended Index.
