# KEY INFORMATION MEMORANDUM

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website [www.idfcmf.com](http://www.idfcmf.com).**

**The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.**

**Investment Objective** The investment objective of the Scheme is to seek to generate income by investing in a portfolio of debt and money market instruments maturing on or before the maturity of the scheme. There is no assurance or guarantee that the objectives of the scheme will be realized.

<b>Asset Allocation Pattern of the scheme</b>	<b>Types of Instruments</b>	<b>Normal Allocation (% of Net Assets)</b>
	Debt and Money Market	0%-100%
	Investment in Securitised Debt - Upto 50% of Net Assets of the Plan(s) Investments in derivatives, foreign securities and stock lending - Nil	

**Investment strategy of the Scheme** The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The aim of the Investment Manager will be to allocate the assets of the Scheme between various money market and fixed income securities with the objective of achieving optimal returns with a highly liquid portfolio. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets.

The Fund has put in place detailed Investment manual defining the prudential and concentration limits for the portfolio limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. All investment decisions are recorded by the fund manager.

Investment Management Committee (IMC) in its periodic meetings will track portfolio investment rationale, portfolio composition, performance etc. Any modifications to the Investment manual is made by the IMC and is duly informed to the board. The performance of the fund will be monitored against its peer group in the industry and presented and reviewed at every Board meeting.

Currently no AMFI - recognised benchmark is available for strict comparison for the Scheme. However CRISIL Composite Bond Fund Index being a widely used benchmark in the market, the same has been selected as a standard benchmark for the purpose of this Scheme.

The fund reserves the right to change the said benchmark and/or adopt one/more other benchmarks to compare the performance of the Scheme.

The AMC may approach rating agencies such as CRISIL, ICRA, etc for ratings of the scheme.

The scheme shall invest only in such securities which mature before the maturity of the scheme.

**The scheme shall mature on September 20, 2011**

**Risk Profile of the Scheme** Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

**Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

**Credit Risk:** In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme would invest as given in the scheme information document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

**Re-investment Risk:** Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

**Basis Risk:** During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio. Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve.

**Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.

**Liquidity Risk:** The corporate debt market is relatively illiquid vis-a-vis the government securities market. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer. Even though the Government Securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the Statement of Additional Information (SAI).

**Repurchase Risk:** The Scheme is a close ended income Scheme. No redemption/repurchase of units shall be allowed prior to the maturity of the scheme. Investors wishing to exit may do so through stock exchange mode. Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

**Risk management strategies** The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in bonds and designed risk management strategies, which are embedded in the investment process to manage such risks.

<b>Risk &amp; Description specific to the Schemes</b>	<b>Risk mitigants / management strategy</b>
<b>Quality risk</b>	
Risk of investing in unsustainable/weak companies	Stringent credit evaluation process to ensure high quality portfolio
<b>Price/timing risk</b>	
Risk of buying the bonds at lower yields compared to fair value due to timing of purchases	Being a close-ended fund, the portfolio is built at the same time and investors are exposed to timing risks. The purchases can be spread over a shorter time frame to ensure the impact is minimized.
<b>Concentration risk</b>	Create a well-distributed portfolio
<b>Liquidity risk</b>	
High impact costs	Being a close-ended fund, the investor will not get any exit at NAV. Selling on the market may have a high impact costs in case the liquidity of the units is low. Investors will be appraised of the risk while investing.
<b>Dematerialization</b>	<p>The Unit holders are given an Option to hold the units by way of an Account Statement or in Dematerialized ("Demat") form. Unit holders opting to hold the units in demat form must provide their Demat Account details in the specified section of the application form. The Unit holder intending to hold the units in Demat form are required to have a beneficiary account with a Depository Participant (DP) (registered with NSDL / CDSL as may be indicated by the Fund at the time of launch of the scheme) and will be required to indicate in the application the DP's name, DP ID Number and the beneficiary account number of the applicant held with the DP.</p> <p>Incase the unit holders do not provide their Demat Account details, an Account Statement shall be sent to them. Such investors will not be able to trade in the stock exchange till their holdings are converted into demat form.</p> <p>No redemption/repurchase of units shall be allowed prior to the maturity of the scheme. Unit holders wishing to exit may do so through the Stock Exchange mode.</p>
<b>Sub Plans and Options</b>	Nil Option: Dividend & Growth
<b>Applicable NAV for repurchase</b>	This is a close ended scheme. Units shall be on offer for subscription only during the New Fund Offer period.
<b>Applicable NAV for sales</b>	No Redemption/ repurchase of units shall be allowed prior to the maturity of the scheme. Unitholders who wish to exit may do so through the Stock Exchange mode. Switch outs to other schemes/plans of the Mutual Fund will be permitted only on maturity of the scheme
