Rs.166.43 Crores

**Inception Date:** 8 July 2003.

**Fund Manager:** Mr. Anupam Joshi  
(Since March 2009)

IDFC SSIF-MT is a fund in the short to medium term income category. The portfolio is a mix of good quality debt instruments including corporate bonds and bank CDs.. The fund strategy states that it can take upto 25% exposure in Government Securities of not more than 11 years tenor, subject to fund manager's view. The overall average maturity of the fund will ordinarily not exceed 4 years. The fund will endeavor to maintain its objective to generate stable long term returns through a mix of accrual income and capital appreciation

**OUTLOOK**

With the RBI now explicitly flagging pause to the hike cycle (barring, of course, fresh pressures from inflation either via new spike in commodity prices or larger than expected pass through to domestic prices), market participants should feel more confident with respect to the short end of the curve. This is also being aided by the fact that pressure of issuance of CDs from banks has subsided, as deposit growth remains healthy versus incremental credit disbursements.

With respect to the long end, corporate spreads should remain supported given the relative lack of supply of corporate bonds. However, the G-Sec curve is struggling with excess supply, fears of further fiscal slippages, and now from potential illiquidity of current investments given that a new 10 year benchmark has been announced.

The market is looking for two possible event triggers:

- The announcement of an expected USD 5 billion hike in FII ceiling for government bonds.
- The start of RBI's open market operations (OMOs) to keep system liquidity deficit within 1% of NDTL of banks.

These will pretty much decide the direction of yields in the near term.

Current Strategy: The fund is predominantly invested in a mix of medium tenor corporate bonds, certificate of deposits, and government bonds.
