Active management of these portfolios is very limited and confined predominantly to the extent of plugging reinvestment and maturity mismatch risks.

OUTLOOK AND OPERATIONS OF THE SCHEME(S)

A) Equity Market Outlook

Government has been able to enthrone the market by continuing its legislative reform agenda. It cleared the new civil aviation policy and relaxed FDI norms in Aviation, Pharma, Media and Defence. There have been more positive signals about the GST likely to be passed. Union cabinet also approved the implementation of 7th Central Pay Commission (CPC) recommendations, effective from 1 Jan 2016. The 16% effective pay hike (pension hikes at 24%) will be applicable to the ~4.7m Central government employees and ~5.2mn pensioners. This is expected to provide impetus to slowing consumption demand. On the Global front, news of Brexit created ripples in the financial markets across the world with most developed and emerging market indices showing huge volatility post the results of British referendum. Indian markets were no different and reacted broadly in line with global indices. Long term repercussions of Britain's exit from EU are still unclear as a lot would depend on when and how the exit happens. Clearly it will have a direct impact on the near term growth in Eurozone. Other can be policy response that may come from China, Japan and other countries to counter any slowdown in export by taking currency action and future referendums that might come from other EU-member countries and potential exits. The most impacted sector from Brexit was IT, as it derives 15-25% of revenue from Euro Zone and has highest sensitivity to currency. Most of the global commodities and domestic agri-commodities have started inching up, this limits the scope of margin expansion which was seen by most of the companies in FY16. The focus therefore going forward will be on revenue growth. Q1FY17 might see some hiccups in growth however we expect it to normalise in 2HY2017E. The trends of last year might repeat this year as well when most of the recovery last year was back-ended.

B) Debt Market Outlook

The current mix of RBI and government policies has been deemed prudent by investors and has helped make the rupee a 'low beta' play amongst most emerging markets (Ems). This has improved the attractiveness of Indian financial assets to offshore investors, most particularly bond investors. A key pillar of India's relatively new found macro-stability is its CPI targeting framework. Thus if the new Governor were seen to be explicitly diluting the CPI targeting framework, the incremental benefit of the rate cuts thus executed may not match up to the risk of losing offshore capital. Yields on 3-4 year government bonds have already fallen sharply and remain relatively well anchored at their current levels as market gains more confidence on improving system liquidity. This has opened up reasonable spread on these bonds versus the 5-8 year sector. For the next few months upward pressure on CPI is likely to sustain which, alongside higher currency volatility on Brexit and our own FCNR payments. Provided currency volatility settles down and post monsoon disinflation is as hoped, the first 'window of opportunity' assuming a more dovish RBI Governor will really be in the October-December quarter.
